Project Governance by Engineers  
**Engineers Becoming Aware of and Practitioners in 12 LESSONS LEARNT**

**OUTCOME FOCUS**

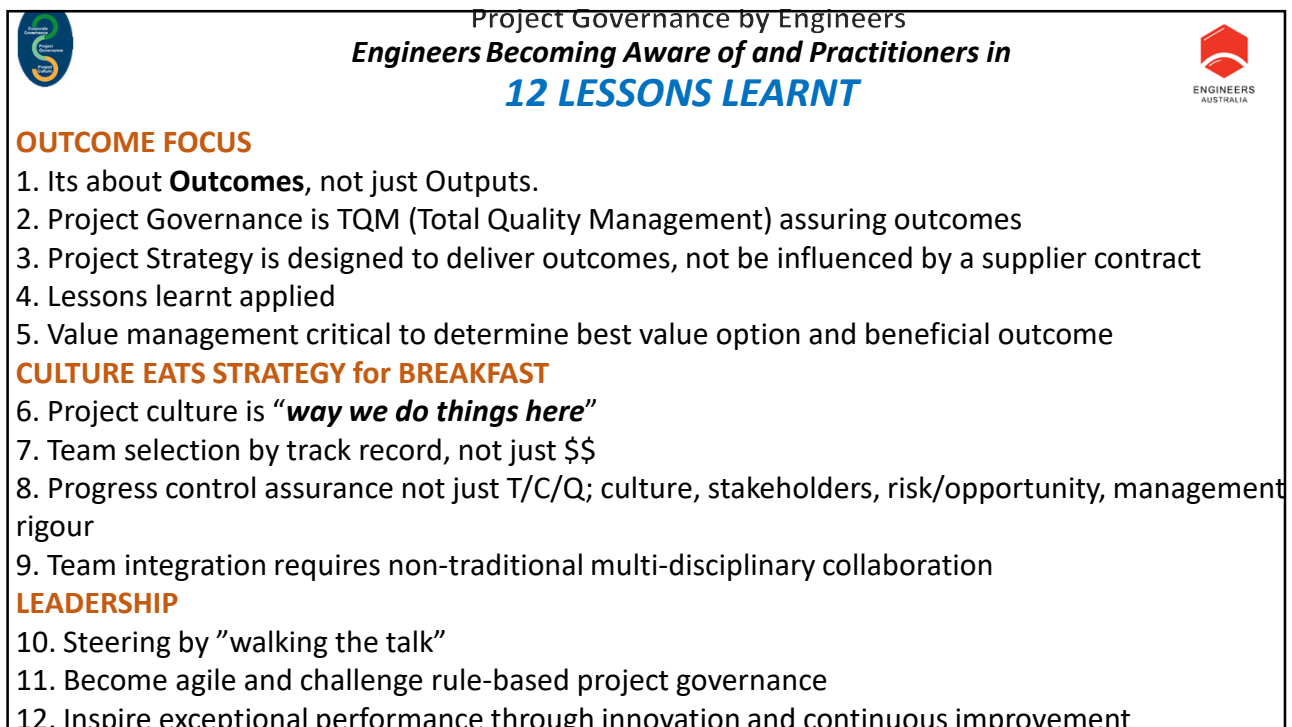

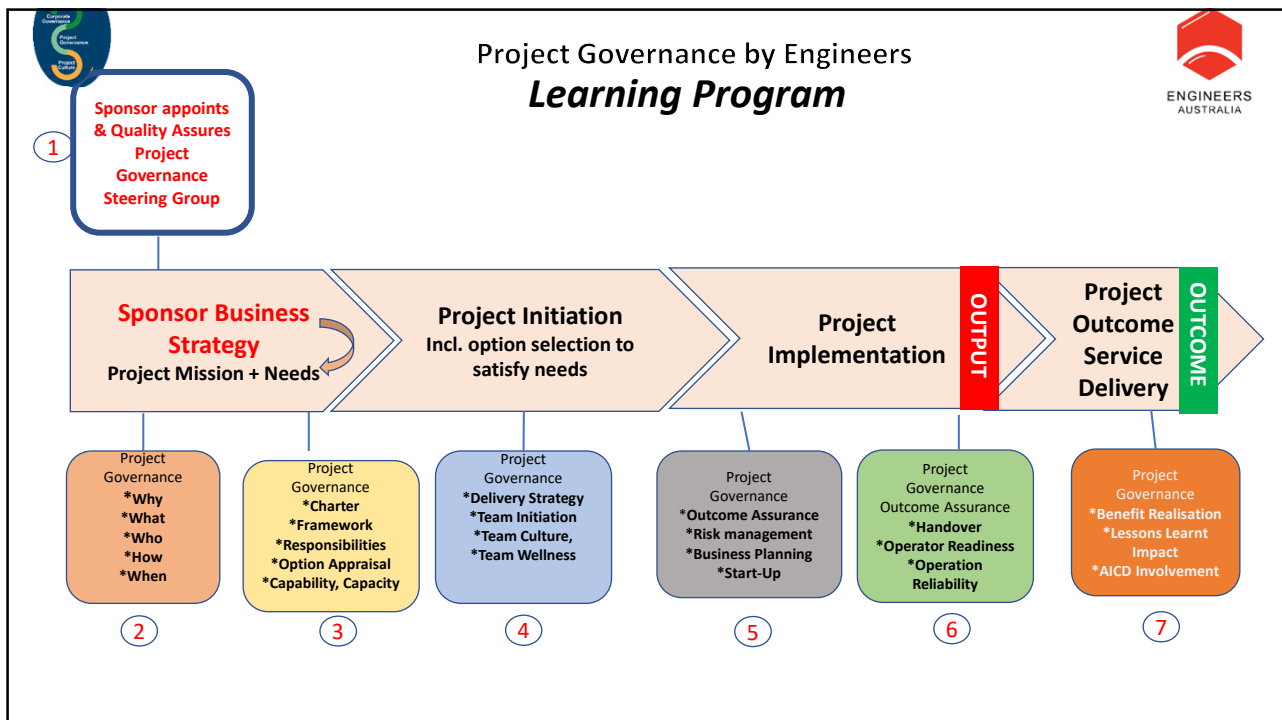

1. Its about **Outcomes**, not just Outputs.
2. Project Governance is TQM (Total Quality Management) assuring outcomes
3. Project Strategy is designed to deliver outcomes, not be influenced by a supplier contract
4. Lessons learnt applied
5. Value management critical to determine best value option and beneficial outcome

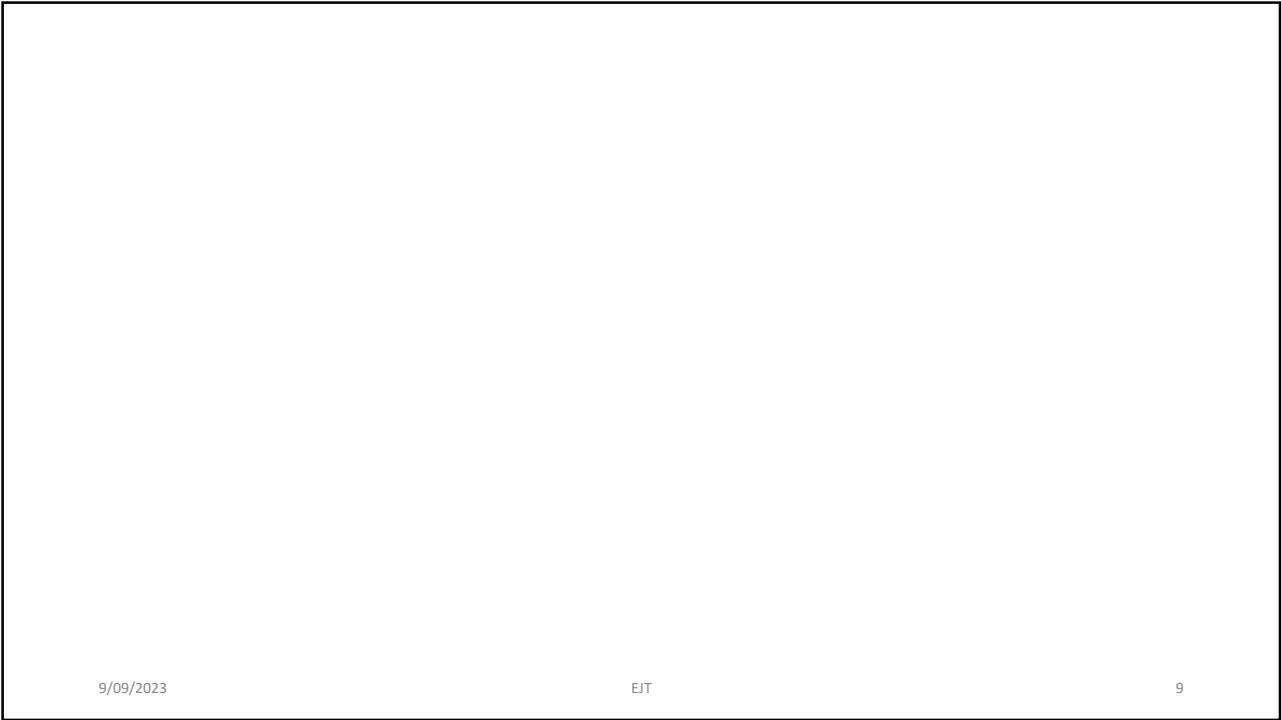

**CULTURE EATS STRATEGY for BREAKFAST**

6. Project culture is *“way we do things here”*
7. Team selection by track record, not just \$\$
8. Progress control assurance not just T/C/Q; culture, stakeholders, risk/opportunity, management rigour
9. Team integration requires non-traditional multi-disciplinary collaboration

**LEADERSHIP**

10. Steering by “walking the talk”
11. Become agile and challenge rule-based project governance
12. Inspire exceptional performance through innovation and continuous improvement
