SPONSORS

Prescience Technology is an award-winning Oracle consultancy, providing Project Management, Technology and Training services to support capital-intensive projects. We work collaboratively with clients to provide outstanding value every time.

Headquartered in Brisbane, with offices throughout Australia and an international base in Singapore, we are known for an unrelenting pursuit of excellence. We pride ourselves on providing honest, pragmatic and relevant advice. We combine the prescience that comes only from experience with deep technical knowledge to drive real business outcomes across the Asia Pacific region.

Our reputation for implementing and supporting Oracle Primavera, Deltek Acumen, Basis and InEight is unrivalled, with each of these solutions clear market leaders to help complete your projects on time and within budget.

TBH was Founded in 1965, TBH is one of the most respected project advisory firms in Australia, with an international presence and a reputation for independent, objective and innovative professional services. TBH can perform our specialist services either as a complete project management solution, in association with other specialists, or as an integrated part of our clients' team. Free from affiliations with external agencies or companies, TBH provide completely independent advice with the highest ethical and professional standards to clients across Australia, New Zealand, Asia and the Middle East. TBH excel in planning and scheduling, integrated project controls, claims and dispute resolution, P3M, cost management, and project management. We partner with our clients to empower their projects, by using the in-depth knowledge we have acquired to develop, implement and maintain the time, cost, risk and reporting functions across each stage of a project's lifecycle.

Pledge Consulting – Helping you build better PMOs. Pledge Consulting specialise in the establishment, support and development of high performing PMOs across a variety of industry types and in both public and private sector environments. We currently work across IT, Engineering, Construction and Business Transformation projects.
